

Timber Reversible Window Specification

Made-to-measure in a choice of design and to any size* – maximising design flexibility.

Manufacture from engineered (TEC) redwood timber to ISO 9000 QA standards – ensuring ultimate quality.

All timber sourced from properly managed sustainable sources – so as to protect the environment.

TEC timbers treated to prolong service.

Rounded arrises to ensure complete and equal cover of wood stain finish.

Wood stain or factory coatings available for ultimate choice and improved quality of finish

AQUATEX weatherseal with PU foam core providing excellent recovery after long-term deflection (Excellent UV stability)

Fully reversible hinge system with restrictor to assist cleaning/maintenance and improve safety.

Espagnolette locking system with sliding 'mushroom' cams to provide added security.

Single, lockable, handle making operation of safety restrictor and opening easier, whilst enhancing security.

Ventilated aluminium bottom bead to provide full drainage facility and improved double glazing unit performance.

Trickle ventilator with concealed insect barrier providing discreet and controllable ventilation.

18 mm Glazing rebate to allow increased gap around double glazing units, improving ventilation and prolonging service of unit.

Factory glazed with Low-E double glazing units providing excellent U-value.

*Subject to standard industry design parameters.
